Professional Summary

Aspiring Software Engineer and MCA (Artificial Intelligence & Machine Learning) graduate with a strong foundation in Java, C++, C, SQL, Data Structures & Algorithms, Object-Oriented Programming, and Database Management Systems. Hands-on experience in developing AI-based, web-based, and database-driven applications through academic and personal projects. Skilled in Java, JSP, Servlets, MySQL, Git, and GitHub with a passion for building scalable software solutions. Seeking an entry-level Software Engineer role to contribute technical expertise while continuously learning modern technologies.

Education

Master of Computer Applications (Artificial Intelligence & Machine Learning) 2024 – 2026
Chandigarh University *CGPA: 6.4/10 (Degree Awaited)*

Bachelor of Science (Information Technology) 2019 – 2022
C.V. Raman University *CGPA: 7.3/10*

Intermediate (Science) 2017 – 2019
M.L.S.M College, Darbhanga *75.8%*

Matriculation 2016 – 2017
S.K High School, Madhubani *71.6%*

Technical Skills

Programming Languages:

Java, C++, C, SQL

Core Computer Science:

Data Structures & Algorithms, Object-Oriented Programming (OOP), Database Management Systems (DBMS), Operating Systems, Computer Networks, SDLC, Agile Methodology

Web Technologies:

HTML, CSS, JavaScript, JSP, Servlets

Database:

MySQL

Developer Tools:

Git, GitHub, VS Code, Microsoft Excel, Power BI

Soft Skills:

Problem Solving, Communication, Teamwork, Leadership, Adaptability

Projects

Sentiment Predictor App

Machine Learning — NLP — Streamlit — Scikit-learn

[GitHub](#)

- Developed a machine learning application to classify text into Positive, Negative, and Neutral sentiments using Natural Language Processing (NLP).
- Performed text preprocessing, feature extraction, model training, and prediction using Scikit-learn.
- Designed an interactive Streamlit interface for real-time sentiment prediction.

Cafe Management System

Java — JSP — Servlets — MySQL

[GitHub](#)

- Developed a web-based cafe management system for menu, billing, customer, and order management.
- Implemented CRUD operations using Java, JSP, Servlets, and MySQL following MVC architecture.
- Improved data management efficiency through database-driven automation.

Smart Snake Game with BFS AI

C++ — Data Structures — Breadth First Search

[GitHub](#)

- Designed an AI-powered Snake Game using the Breadth First Search (BFS) algorithm for autonomous navigation.
- Applied graph traversal and Data Structures concepts to identify the shortest safe path.
- Strengthened algorithm design and problem-solving skills through practical implementation.

Gym Management System

SQL — MySQL — Database Management

[GitHub](#)

- Designed a relational database system to manage members, subscriptions, trainers, and payments.
- Created normalized database tables and optimized SQL queries for efficient record management.
- Automated manual record-keeping using database management techniques.

Text-to-Speech Converter

Python — Tkinter — pyttsx3

[GitHub](#)

- Built a desktop application that converts user-entered text into speech using Python libraries.
- Developed a graphical interface with Tkinter for an intuitive user experience.
- Integrated speech synthesis for real-time voice generation and improved accessibility.

Certifications

- Machine Learning with Python: From Data to Deployment — Chandigarh University (Coursera)
- Intermediate Object-Oriented Programming with Java — Coursera Project Network
- Foundations: Data, Data, Everywhere — Google (Coursera)
- Angular — Infosys Springboard
- Basics of Internet of Things — Chandigarh University (Coursera)

Achievements

- Developed 5+ software projects using Java, SQL, C++, and Machine Learning.
- Strong understanding of Data Structures & Algorithms using C++.
- Active GitHub profile showcasing academic and personal software projects.
- Completed multiple industry-recognized certifications in Java, Machine Learning, Data Analytics, and Web Development.

Languages

English (Professional) • Hindi (Native) • Maithili (Native)
